METAL ART WORKS

We are a Portuguese company, specialized in the production of high quality, exquisite furniture.

Our company emerged during the fast growth of the traditional contemporary furniture market. And, in that moment, we began looking for qualified, open-minded people as motivated as we were.

As we dove into the world of contemporary design, we began reinventing ourselves as we started exploring uses of metals and semi-metals. Since, we've specialized in the production of custom-made, contemporary furniture, both urban and for interiors, guided by high quality standards and mastering the attention for detail.

We strive to constantly keep up with cutting edge technology, as well as innovative designs and techniques. With more than 10 years of experience, we assume ourselves as a young, dynamic and qualified team.

Our work ethic is "Tailor-Made". This means that the cliente creates the design, and we bring it to life. Our talented craftsmen ensure that the quality of the final product meets the client's expectations.

Every project is a new challenge, and, with every one of them, we become more proficiente and knowledgeable in our work, wich allows us to explore new concepts and materials.

We master the technique of sand casting, allowing the manufacture of various models of hardware, such as pieces of personalized furniture in the quantities desired by the customer.

Chiseling is a technique mastered by our artisans that allows to create volume, reliefs and textures, allowing the creation of several improved designs. These processes are produced by our artisans manually, requiring care, demand and precision.

Our brand has an impressive collection of molds, most of them are from handles with over 500 years of history. All the pieces are chiseled by hand, giving them a unique value and high-quality details. You may visit in our factory some our best works of last century and talk with one of our consultants and request advice for concept or development of your project, from the idea until the final end.

We create memorable experiences where each customer is unique and can find the fulfillment of their dreams. We combine old techniques with innovation, working with the finest metals, brass, copper, bronze, silver and gold. For us each project is a challenge that allows us to explore countless possibilities.

Brass may vary the colour under the conditions in which it is found, even after application of sealing varnish. Shipping can change the colour of the brass. The oxidation shade, when required this finish, will be as close as possible to the sample approved by the customer, as it is a handmade treatment.
